NEW SUPPLY CHAIN SHORTAGE REPORTING TOOL

To support ongoing health care system pharmaceutical and supply chain shortages, hospitals are encouraged to report any supply chain disruptions as they arise in one of two ways.

The information provided will improve situational awareness and allow MHA to facilitate technical support and coordination among local, state and federal entities as deemed necessary. This information also will help MHA understand the extent and impact of the shortage to inform advocacy efforts and provide technical assistance to mitigate shortages.

1

Log in to EMResource and report the shortage by clicking the shortage reporting button near the top of the screen. **This platform is the preferred central source of reporting this information.** If you have questions specific to EMResource or would like to request access, please contact Carissa Van Hunnik at CVanHunnik@mohospitals.org.

2

Visit MHA's website or snap this QR code to complete the survey.
